MASSIVE DEPOSIT H 2801-L

Main function:

- Massive deposit of banknotes (bundle of up to 500 bills).

The H2801-L model automates massive deposit of banknotes (bundle of up to 500 banknotes). The banknotes are, counted, validated, valued and sorted to high velocity.

The deposits are done with total security, because the serial number can be captured and stored in order to allow the exact traceability of the deposited banknotes.

It is suitable for indoor installations, in shopping centers, hypermarkets or superstores. The merchants deposit his cash collection in fast and sure form, The deposited amount can be available in his account when the operation finish.

H2801-L fulfils all the current regulations relating to ergonomics and logical/physical security.
